

Network Services

CoLo / Broadband / Hosting

Freeway Communications is a Co-Location and Broadband supplier with T1 to multi-gigabit connectivity severing Small and Medium Business and Enterprise Customers. Our carrier relationships allow us to bring dependable and competitive solutions to our customers both domestic and International. Whether the Broadband requirements are Point to Point, VPN's, DATA, VoIP or Dedicated Telecom Service, our solutions will deliver reliable mission critical circuits and save you money. Our **Co-Lo** facility has around the clock manned security and technical support with raised floors, data center grade HAFC, Battery Back-Up with Stand-By Generators and redundant connectivity making our facilities world class.

Key Feature and Benefits:

Data Center / Co-Location Services

Whether you have **Co-Lo** requirements for a single server, partial or multiple cabinets or even greater we have programs to meet your needs. You have more option with our facility as we have direct access to over **150 Carriers** in downtown Los Angeles. **Freeway Communications** offers **Managed Services** such as installation, with ongoing support to maintain systems and equipment. Our state of the art facility maintains direct connection to redundant backbones on a Full Meshed Network with sustainable high bandwidth availability (speeds up to OC-192) to meet your needs today and through your growth in the future. All power is connected to a UPS system consisting of a battery plant plus stand-by generators N +1 (five generators) with 90,000 gallons of fuel on site. Commercial power is served by two separate grids from LA-DWP and we have redundant HVAC and fire-suppression. Our facility is a highly secure, stable and safe environment with 24x 7x 365 personnel on site.

Business Class Broadband Connections

Whether your requirements are dedicated internet access, point-to-point or an integrated voice & data circuit, **Freeway Communications** provides affordable high speed solutions to businesses ranging from a T1 to OC-192. Our network architecture provides multiple redundant internet and telecom backbone access sources for maximum reliability. Our competitive pricing and dependable service has fueled our growth and insured our network reliability.

Hosting & Fully Managed Services

Choose from **Freeway Communications'** premium Windows or Linux dedicated server hosting for extreme speed and performance monitoring. We offer Email hosting for your domain including 100MB capacity boxes and messages up to 10MB each standard, with larger capacity available as an option. Flexible Email access connecting via Web, POP3, SMTP, or IMAP.
